

American Legion Auxiliary of Ohio

*Serving Veterans, their Families
and their Communities across Ohio*

The American Legion Auxiliary Of Ohio recently upgraded the server and computers in their Zanesville office. Image Computer Solutions provided a brand new Microsoft Windows based Server as well as a dedicated daily backup solution. At this time the American Legion also acquired new Windows 8 based PC's and a new Windows 8 based notebook/tablet. The upgrades were much needed and were a huge success. There was very little downtime during the install and the office is now running up to date software on new modern hardware across the board. This is allowing the American Legion here in Zanesville to operate securely and more efficiently.

ICS offers free evaluations for any size business or organization. We offer many services to assist our small and medium size business clients including, networking and server evaluations/installations, business consulting, web site design, development and hosting, backup solutions, off-site backup and disaster recovery, video IP based security systems, IP based telephone systems, software and hardware troubleshooting, co-location servers, and many other services.
