

Successful companies are built on trusted, lasting relationships. Having someone you know will do the job as if they were doing it for themselves. When The Original Bloomer Candy Co needed help with their new ERP Software solution they called Image Computer Solutions. A complete and free evaluation was provided that mapped out a full solution for the ERP project. A completely new cabling infrastructure was installed together with new networking, workstations, and server solutions. Once completed ICS continued to work with the Bloomer Candy staff and management ensuring that every process was restored to full operation on the new system. ICS also continued to work directly with the ERP software company ensuring their software solution could be fully implemented.

Find out how your company can benefit by having a trusted, local, IT Provider. Call 740-453-5953 for your free, on site, no commitment, evaluation. Or Email us at [info@imagecomputersolutions.com](mailto:info@imagecomputersolutions.com).
