

## Image Computer Solutions Upgrades Perry Behavioral Health Choices In New Lexington

Image Computer Solutions has completed significant upgrades for Perry Behavioral Health Choices (PBHC) in New Lexington. PBHC has two locations and Image Computer Solutions provided a brand new "Main" server as well as a new server for remote users at the second facility. A total of 12 new workstations were replaced at this time as well. The new work stations run Windows 8 and Office 2013. Along with these upgrades new cabling was done at PBHC to allow for new devices including Network Switches, Wireless Access Points, Printers/Scanners and more. Finally PBHC was able to upgrade their internet service through Image Computer Solutions going from an old slow DSL connection to a high speed cable connection. These upgrades were a huge success and PBHC's facilities are now running safer and more efficiently.

ICS provides free on site evaluations for any of our services. Visit our web site for full details or contact us via Email or phone.
